

IRLENE GALIZA

ABOUT ME

I am a professional driven by curiosity and self-directed learning. I discovered a passion for programming and the world of technology. This experience has allowed me to integrate my legal knowledge and interpersonal skills with technical expertise, challenging myself to explore new opportunities in the technology field.

I constantly seek to stay updated on new technologies and market demands. Subsequently, I apply this knowledge to projects to enhance my skills and address challenges comprehensively, finding practical and effective solutions.

I am interested in joining projects that allow me to collaborate with talented and creative teams. I believe that the combination of my legal background and technological expertise can be a valuable asset in addressing these challenges uniquely and effectively.
