Experience

Python/Odoo Developer — HTS

Jun 2023 - Present

- Built React + FastAPI booking engine integrated with Odoo, enabling real-time reservations
- Built interactive visual room scheduler in Odoo 17 with JS vis-timeline & OWL, enabling real-time booking management and faster front-desk operations.
- Built a new hotel management module in Odoo 17 from scratch with the team, covering reservations, operations, and reporting.
- Developed daily operational reports for kitchen, housekeeping, and front desk, improving team efficiency and decision-making.
- Migrated customer data from Odoo 10 → 17 with custom scripts, ensuring 100% data accuracy
- Extended Odoo POS UI with OWL patches to support smart bill splitting, custom numpad actions, and receipt adjustments.
- Extended product configuration to support dynamic seasonal pricing and multi-guest rate structures.

Python/Odoo Developer — Swiss Capital

Sep 2020 - Jul 2023

- Developed system to fetch bank transactions via API and automatically apply payments to user loan balances, streamlining monthly loan processing.

Overdue Loans Management System (Odoo 11):

- Replaced manual process with a fully automated Odoo module.
- Integrated with external APIs to fetch and update users' overdue loan data in real time.
- Distributed loans across 10 departments based on loan type and overdue days, supporting department-specific processes.
- Managed access control and security rules to ensure users only saw and acted on loans relevant to their department.
- Enabled over 100 internal users to manage overdue loans efficiently, reducing errors and manual effort.

Reporting system (Odoo 11, SQL)

- Created SQL-based report to track user overpayments on loans for specified dates, enabling timely refunds and accurate financial tracking.
- Created SQL procedure to compute call center sales and bonuses, ensuring accurate performance-based rewards.
- Created SQL report to track overdue loans by type and period, supporting blacklist generation and collection management.

Skills

Python, Odoo, XML, Qweb PostgreSQL, HTML, CSS, JS, OWL, FastAPI, React, Git, Gitlab, CI/CD, Docker, K8s, Linux

Education

Bachelor of Information Technology — Business and Technology University

2018 - 2022
